Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

2. Claims 17, 33, and 34 are rejected under 35 U.S.C. 102(e) as being anticipated by Shibata et al., 6,226,264 (Shibata).

Shibata discloses an ATM cell multiplexer.

Specifically regarding the present claims 17, 33, and 34, Shibata teaches a terminal installation adapted to be connected to a telecommunication line (trunk circuit, indicated in Fig. 2) for conveying network cells in ATM mode, the installation comprising terminals (CLADs 13-1 through 13-4 connecting respective terminal circuits), a broadcast arrangement for broadcasting to the terminals all the network cells received

via a received channel of the telecommunication line (in the down direction from the ATM switchboard, the cells are broadcast to all of the CLAD units, see Abstract, and col. 5, lines 53-62) and a collection arrangement for collecting cells produced by the terminals and transmitting the collected cells in an emit channel of the telecommunication line (ATM bus scheduler 11 achieves cell multiplexing operations, and multiplexed cell transmission to the trunk circuit, see col. 2, lines 2-39).

Allowable Subject Matter

3. Claims 18-32 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

4. Applicant's arguments, filed December 21, 2005, with respect to the rejection(s) of claim(s) 17-32 under 35 USC 112 and 35 USC 103 have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of the newly found prior art reference Shibata et al.

Conclusion

Art Unit: 2663

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The Yamada patent, the Allingham et al. patent, and the Birdwell patent are cited for further references.
